

AMIT KUMAR MISHRA

Python Developer | Machine Learning Engineer

Built 3 end-to-end Python & AI projects with publicly available source code.

Professional Summary

Physics graduate with hands-on experience building Python backend applications and end-to-end machine learning systems using Python, FastAPI, Flask, XGBoost, ML algorithms, SQL and React. Seeking a Python Developer role.

Technical Skills

Languages: Python, SQL, Java (Basics)

Backend: FastAPI, Flask, REST APIs

Machine Learning: Pandas, NumPy, Scikit-learn, XGBoost, SMOTE

Frontend: React, TypeScript, Tailwind CSS

Databases: Google BigQuery, SQLite

Tools: Git, GitHub, Docker, Linux

Core: Object-oriented programming (OOP), REST APIs, Data Structure & Algorithms (learning)

Projects

MedVerify – AI-Powered Medicine Authenticator

- Built an AI-powered medicine authentication platform using **Flask, Groq Llama 3, EasyOCR, OpenCV, and Google BigQuery**.
- Designed an **offline-first architecture** with secure backend validation for low-connectivity environments.
- Implemented REST APIs, OCR pipeline, barcode verification, and production-oriented backend security.
- [Repository](#): github.com/Amit4517187/med-verify-authenticator

Credit Underwriting Engine (In Progress)

- Built a machine learning pipeline using **feature engineering, XGBoost, and SMOTE** for credit-risk prediction.
- Developing **FastAPI REST APIs** and integrating the prediction engine with a React frontend.
- [Repository](#): github.com/Amit4517187/credit-engine

Telecom Customer Churn Prediction

- Customer churn prediction pipeline.
- Preprocessing, feature engineering and model evaluation.
- [Repository](#): github.com/Amit4517187/Telecom-customer-churn-main

Education

B.Sc. Physics | Marwari College, Bhagalpur | 2021–2024 | CGPA: 6.7

Certifications

Deloitte Australia – Data Analytics Job Simulation (Forage)

Google Kaggle – 5-Day AI Agents Intensive

HCL GUVI – AI Impact Summit Buildathon
